Spyglass Marine Vessel Commission Program

Throughout the years Yachts have evolved in both design and sophistication. From the scores of new electronics, to the sophisticated on-board comfort and leisure systems, today's Yachts require of their owners a greater understanding of their vessel from engine room to the upper deck. Spyglass Marine has developed a program to systematically explore and explain these systems to new owners so they can take full advantage of their new vessel.

Pre-Delivery Discussion

We take the time to fully understand how the new owners intend to use their vessels. Are they weekend boaters, Great Lakes travelers or about to set off on the Great Circle Route? Are they mechanically inclined or do they just want to know the basics.

Uniform Curriculum

Our goal is simple, we want new owners to explore and understand every system, every nook and cranny of their new vessel. We take a systematic approach to reviewing their vessel's Engine Room, Electrical Systems, Fuel Systems, Plumbing Systems, Electronics, and then take a demonstration ride to review and assess their basic ship handling capabilities.

Enhanced Training (Optional)

"Cruise and Learn" is another value added program offered by Spyglass Marine. We come to your vessel and spend time working with you and your crew (spouse/children/friends). We will provide hands-on coaching in; Pre-Departure Procedures, Maneuvering (in and out of *your* particular slip), Fueling, Electronics Operation (actual cruise planning and voyage execution), Generator/Electrical Operations, Anchoring/Rafting, MOB and Emergency Procedures. Cruise and Learn provides the best stage to learn the operation and systems of your vessel while under the watchful eye of a Spyglass Captain.
