

# Spyglass Marine Services, Inc.

**We deliver *your* most prized possession...**

Spyglass Marine provides powerboat delivery/relocations services, sea trials, movement of show boats and in-water assistance to boat brokers and private individuals throughout the Great Lakes.

Spyglass Marine Captains are U.S. Coast Guard Licensed Master Captains with Commercial Towing Endorsements. All Master Captains must demonstrate a complete understanding of the International and U.S. Inland "Rules of the Road," all aspects of electronic and compass navigation, chart plotting, deck safety, weather and emergency medical procedures. A Master Captain does more than simply steer your vessel to a destination, he makes decisions. Decisions that are based on years of experience dealing with all types of weather and sea conditions along with the inevitable mechanical issues that find their way into virtually every voyage.

Our promise to you is simple... Spyglass Marine will deliver your vessel as expediently as possible with the safest of maritime conduct. Our respect for your vessel will guide our every decision.

The day of departure we perform a vessel safety inspection to insure your vessel meets all USCG safety and regulatory requirements. We go below decks and inspect through-hull fittings, sea cocks, all hoses and clamps, belts, control cables, linkages and transmission collar bolts. Electrical wiring and batteries are inspected. All engine and transmission fluid levels are checked and recorded. We cycle through all the navigational and communication equipment to verify operation.

Once on the water our Captains begin their trip log. This log provides hourly position reports, tachometer readings, average speed and any critical information. The trip log and all expense receipts are summarized and presented at the conclusion of the delivery.

Spyglass Marine is staffed by lifelong boaters who are putting their credentials and passions to work for you. Please consider us for delivery services or yachtsman instruction.
